

Power of the green™

Venetian Series R-5 Vinyl Patio Door (S-6500)

INTRODUCTION Vinyl Patio Door

More than just a provider of breathtaking quality, Green World door is engineered for stylish appearance and versatility, available for both replacements and new constructions.

To give you advanced performance and comfort, Green World Windows highlights triple-pane options in Venetian SESS (Super Energy Saving Star), which is the most update R-5 door.

The striking features of triple-pane design (R-5) are higher energy performance and lower purchase prices compared to standard two-pane Low-E3 door (R-3) in the long run. R-5 doors can reduce whole-house heating load through the door by 30% to 40%, significantly lower noise level and achieve less than a 5 year simple payback.

The Venetian Series Doors with Low-E glass I.G. filled with argon are in the Green World Windows "GreenMax" package, which is the Future door, far beyond current Energy Star requirements.

With style, beauty and value in a door, you are in control. This is the very thing we can help you!

For more warranty information contact an authorized Green World Windows Dealer or go to www.greenworldwindows.com
