# Venetian Series MULTI-SLIDE DOOR (S-6800)

## STANDARD FEATURES

- Unlimited configurations and widths. Our Multi-Slide Stacking Doors can be built as wide as your project needs. Dream big.
- Rolling panels can be stored in pockets or stacked at one or both ends of the opening.
- Panels can bi-part at 90 degrees, 180 degrees or any angle in-between.
- Panels are available up to a 12' height, and width and heights can be mixed and matched to create a massive 60-square-foot panels.
- Multi-Slide Doors or Windows that are stored in pockets are designed to be totally flush with adjacent wall finishes, providing an unobstructed view of your patio, pool or landscape.
- Door panels open with ease with the option of Green World Windows heavy duty steel ball bearing "Monster Roller."
- The modular frame design of our stacking system allows you to configure any number of rolling or fixed glass panels to meet your design.
- True to our design intent, everything from handle hardware to track details are clean, minimal and deliberately disappear.
- Head and threshold assemblies of pocket doors are prepared to precisely locate field-applied interior and exterior post-interlock members to ensure a full interlock and clean installation.
- Green World Windows Medium Stile has a 2.5" interlock that provides additional rigidity and strength while maintaining a clean, modern look and minimal sightline.
- Multi-Slide Doors and Windows can be prepped for motorization to allow customers to close and open the doors with the touch of a button.
